#### Abraham Lincoln Elementary School Student Survey: 2014-2015/16 Longitudinal Report

Statements are displayed in rank order from the most negative to most positive difference. A difference of 0.2 or larger is considered significant. Cells containing significant positive differences are color-coded in green and those containing significant negative differences are in red. Cells containing differences that are not significant are gray. (Any items that do not use a 5-point rubric scale have not been color-coded.)

## Interactions

Respondents were asked to indicate the frequency for each item based on the following scale: Always (5), Often (4), Not very often (2), Never (1), I don't know/doesn't apply (0)

#### Benjamin Franklin Elementary School Student Survey: 2014-2015/16 Longitudinal Report

Statements are displayed in rank order from the most negative to most positive difference. A difference of 0.2 or larger is considered significant. Cells containing significant positive differences are color-coded in green and those containing significant negative differences are in red. Cells containing differences that are not significant are gray. (Any items that do not use a 5-point rubric scale have not been color-coded.)

#### Churchill Elementary School Student Survey: 2014-2015/16 Longitudinal Report

Statements are displayed in rank order from the most negative to most positive difference. A difference of 0.2 or larger is considered significant. Cells containing significant positive differences are color-coded in green and those containing significant negative differences are in red. Cells containing differences that are not significant are gray. (Any items that do not use a 5-point rubric scale have not been color-coded.)

#### Forest Glen Elementary School Student Survey: 2014-2015/16 Longitudinal Report

Statements are displayed in rank order from the most negative to most positive difference. A difference of 0.2 or larger is considered significant. Cells containing significant positive differences are color-coded in green and those containing significant negative differences are in red. Cells containing differences that are not significant are gray. (Any items that do not use a 5-point rubric scale have not been color-coded.)

#### Hadley Junior High School Student Survey: 2014-2015/16 Longitudinal Report

Statements are displayed in rank order from the most negative to most positive difference. A difference of 0.2 or larger is considered significant. Cells containing significant positive differences are color-coded in green and those containing significant negative differences are in red. Cells containing differences that are not significant are gray. (Any items that do not use a 5-point rubric scale have not been color-coded.)
